TELEGRAPH ADDRESS "LILYDALE"

EARLY OCTOBER DELIVERY

We do not recommend springplanting of lilies. Those offered at that time are bulbs held over in cold storage, or imported bulbs, which have been weakened in the long transit and, as a rule, have performed very unsatisfactory in the past.

The lilies we send out are Oregon grown top Quality bulbs, as a rule dug the day shipped. The bulbs will reach you in live, vigorous condition, no shriveled up bulbs ever leave our gardens. Order from us and see the difference for yourself.

We guarantee our bulbs to be healthy and true to name, However, we cannot be held responsible for losses due to improper planting conditions or lack of proper care.

Planting Instructions will be sent with orders, for depth and location of various lilies consult our list of lilies.

Plant lilies, the glory of any garden.

MEMO

Lily Price List 1953

L. AMABILE (Korea)

A dainty Korean species with reflexed flowers of grenadine red densely spotted with black. Blooms late June. Height 1½-3 feet. Plant 4-5" deep, full sun or light shade.

Each 75c

L. AMABILE LUTEUM

One of the loveliest of the yellow-flowered lilies. Growing to a height of 2-3 feet, it produces a striking effect if planted against dark foliage. Blooms late June. Plant 4" deep in sun or light shade.

Top size bulbs \$1.00 each, 6 for \$5.00

L. AURATUM (Type)

This is the Gold Band Lily originally from Japan with immense bowl shaped and fragrant flowers. The color is waxy white, spotted crimson towards the center with a band of gold running through the middle of each petal. Our strong, healthy stock of this lily, grown in the Northwest, will give better results than imported bulbs which, if not diseased, have been weakened by the long period in transit. August-September flowering, plant 5-6" deep in light shade, acid soil and well-drained location. Provide plenty of moisture.

Each \$1.15

L. AURATUM PLATYPHYLLUM

This is the most robust form of Auratums, leaves are broader and blooms more numerous and larger, also hardier than the Type, height 4-6 ft. August-Sept. flowering.

Each \$1.45

L. AURELIAN HYBRIDS

The most important of all the new races of Hybrids, the types we offer are the results of crosses between L. Henryi, L. Sargentiae, L. Sulphureum, etc. Plant 6" deep in well drained fertile soil mixed with peat moss. Light shade preferred to prevent fading of flowers.

AURELIAN BRIGHT CLOUD (Carlton Yerex Hybrid)

This lily is a first generation hybrid from a cross made in 1940, Henryi X L. Aurelianense seeding. Established plants reach a height of 6 feet or more and carry as many as twenty large, broadly recurving flowers with margins and tips of pure white and centers of bright yellow. Blooms for a long period due to secondary blooms which open on the lower peduncles as the primary flowers are falling. Staking advisable to help hold the broad panicles erect.

Each \$5.00

AURELIAN GOLDEN TRUMPETS (Carlton Yerex Hybrid)

A grand strain of the originators stock, all selected and tagged while in flower to assure uniformity. The large fragrant trumpets are light unspotted golden yellow, in form somewhat like L. Centifolium. Height 5-6', July-August flowering.

Each \$3.00

HEARTS DESIRE

Intermediate between the trumpet and the L. Henryi shape. Flowers large, essentially shallow, widely flared and bowl-shaped in shades of white, cream and yellow-orange.

Each \$3.00

SUNBURST

This group consists of shapes most closely resembling L. Henryi but of much larger flowers and less recurving than L. Henryi. Colors white, cream, yellow and orange.

Each \$2.25

L. MRS. R. O. BACKHOUSE (Hybrid L. Martagon X L. Hansonii)

Recurved, small, Indian yellow spotted brownish purple. Height 5 feet, late June flowering. Very scarce. Plant 5" deep in partial shade. Exquisite item for the collector.

Each \$3.00

L. BACKHOUSE HYBRID SEEDLINGS

For a grand mixture of seedlings ranging in color from white, cream through yellow and orange red, spotted mahogany we recommend.

6 bulbs for \$10.00 (Each \$2.25)

L. BOLERO (Jan de Graaff Mid-Century Hybrid, Upright Flowers)

Unusual shade of cinnamon brown and mahogany. Tall, late flowering with fine placement of individual flowers. Petals dotted with small maroon spots. Largest flowered lily of all the upright new introductions. Plant 4-5" deep, full sun.

Each \$3.00

L. BONANZA (Jan de Graaff Mid Century Hybrid, Upright)

This is another upright type and of clean orange-yellow coloring and of wonderful texture. Plant 4-5" deep, full sun.

Each \$1.30; 6 for \$6.50

L. BROCADE

Recurved, lemon yellow suffused fuchsia purple at tips and petal edges. Center dotted dark purple. Height 5 ft. late June flowering. Plant 5" deep in partial shade. Very rare.

Each \$3.50

L. BROWNII (China)

This superb lily is considered by many as one of the loveliest of the trumpet flowered group. The strong stems have glossy handsome foliage. The two or three flowers of classic beauty are marble white, stained purple on the exterior, anthers chocolate brown. Fragrant. Plant 6-7" deep, sun or partial shade.

Each \$3.50

L. BRENDA WATTS (Preston Hybrid)

One of Miss Preston's hybrids with five-foot stalk and large, slightly recurved fire-red flowers dotted purple black toward the center, that is certain to attract attention in any garden. Plant in sun or partial shade 5" deep. Late June flowering.

Large bulbs, each \$1.00; 6 for \$5.00

L. CAMFIRE (Jan de Graaff Mid Century Hybrid, Upright)

Large flowers of rich, fiery Indian red, petals pointed, rather narrow, making it a distinct lily. Plant 4-5" deep, full sun.

Each \$1.50; 6 for \$7.50

L. CANADENSE FLAVUM (Eastern North American)

Graceful bell-shaped flowers are produced in early July on tall stems, color golden yellow. Plant 5-6" deep in light woodland soil, partial shade.

Each 65c

L. CERNUUM (Korea)

This is a dainty small lily from Korea, very similar in form to *L. Tenuifolium* (*Pumilum*) except that the delightfully fragrant flowers vary from pale pink to a lilac color with deep purple spots. Excellent grown in rock gardens in sun or partial shade. Blooms June-July; 1½-3' high. Plant 4" deep.

Each 85c; 6 for \$4.25

L. CHEROKEE (new Dr. E. F. Palmer introduction)

Large brick red flowers dotted maroon. Flowers face out and slightly up on 4-5' stems. Same parentage as *L. Red Bird* but later flowering carrying well into August. Bearing stem bulbils. Very vigorous plant. Same culture as *L. Red Bird*.

Each \$2.00

L. CONCOLOR RACEMOSA (China)

An excellent rock garden lily, carries more and larger flowers than the type on a taller stem. The upright, bright orange, spotted mahogany star shaped flowers make it very suitable for arrangements. June-July flowering. Plant in sunny location 3-4" deep.

Each 75c; 6 for \$4.00

L. CORONATION (Preston Hybrid)

Another Preston Hybrid produced at the Central Experimental farm, Ottawa, Canada. The flowers are deep yellow, lightly spotted red-brown and are of medium size held horizontally to the stem. It grows to a height of 3½-5 feet and flowers during late June and early July. As all Preston Hybrids, it is very hardy, does equally well in full sun or light shade. Plant 4-5" deep.

Each \$1.75

L. CORSAIR (Preston-Hybrid)

One of Miss Isabella Preston's newest Hybrids with medium sized, upright vase-shaped flowers of a soft tangerine orange, flushed red at the tips. 12-15 flowers to a stem, 2-3' tall, June-July flowering. Plant 4-5" deep, full sun or light shade.

Each \$2.00

L. DALHANSONII (1890 Hybrid Martagon Dalmaticum X Hansonii)

Very vigorous and of easiest garden culture. Flowers thick petaled, recurved, deep mahogany red, June flowering. Plant 5" deep, partial shade.

Each \$3.00

L. DAURICUM WILSONII

A native of Northeast Asia, 2-3 feet tall with erect, large flowers of deep apricot, spotted mahogany. Blooms during August. Plant in sun or partial shade, 4" deep.

Each 50c; 6 for \$2.75; Dozen \$5.00

L. DR. ABEL (Jan de Graaff)

This is the darkest red found in the Fiesta Hybrids growing to a height of 4-6' with pendant flowers densely speckled black, strongly recurved; a beautiful, strong flowering lily. Plant 5" deep, full sun.

Each \$1.00; 6 for \$5.25

L. EDMUND L. KAGY (Edgar L. Kline, T. A. Have-meyer Hybrid)

The 8" persimmon orange lightly flecked flowers are carried on erect 6' stems. A very unusual lily. Plant 5-6" deep in light shade.

Each \$4.50

L. EDNA KEAN (Preston Hybrid)

Resembling Brenda Watts in form but a much deeper red, spotted black. Grows 3-4' tall. Plant in full sun or partial shade, 5" deep.

Each 75c; 6 for \$4.15; Dozen \$8.00

L. ELEGANS GOLD CUP HYBRIDS

A strain of early upright flowering lilies grown from seed from an original cross of L. Elegans Orange Queen (syn. Alice Wilson) X L. Dauricum Luteum. The plants are of rather uniform height (18-24") and carry large showy flowers in a range of colors from deep apricot to golden yellow. Some unspotted forms will occur but they are generally dotted dark mahogany. This strain retains the hardiness and ease of culture associated with the Elegans-Umbellatum group but eliminates the less desirable colors in the dark orange and orange red shades.

Each \$1.00; 6 for \$5.00

L. ELEGANS MAHOGANY (Hybrid)

Erect, medium, cardinal red, height 1-2 feet, June flowering. Plant 5" deep, full sun. A most brilliant color.

Each 50c; 6 for \$2.75

L. FIESTA HYBRIDS (Jan de Graaff)

As cheerful and gaily colored as the name implies. This new race of lilies, originally Dr. Abels hybrids, has neatly reflexed flowers nicely spaced on thin, wiry stems. Most flowers recurved Turk's cap style. Some have blossoms facing outward. Color bright yellow through orange to a beautiful dark rich red. Excellent cut flower. Height 3-6'. Blooms during July. Plant in full sun 5-6" deep.

Large bulbs, each 75c; 6 for \$3.75

L. FIREFLAME (Jan de Graaff Mid Century Hybrid, Outwardfacing)

This is a sturdy lily, growing to a height of 18-25" with solid, large mahogany red flowers facing outward. Slightly spotted with black or deep maroon, petals heavily textured. Plant in full sun, 5" deep.

Each \$1.50; 6 for \$7.50

L. FIRE KING (Wilcrovidii-Umbellatum Hybrid)

One of the most brilliant and handsome hybrid lilies of recent introduction. The large, fiery red recurved flowers are held horizontally to the sturdy stems which reach a height of 3-4 feet. Mature bulbs will carry up to 30 flowers of exceptional substance and keeping quality. Plant in sun or partial shade 5" deep. Late June flowering.

Each \$1.75; 6 for \$8.75

L. FLAMINGO (Jan de Graaff Rainbow Hybrid, Upward)

A 1948 introduction resulting from a cross between Umbellatum and Dauricum Elegans. This free flowering, fast multiplying lily of vigorous growth will make friends in every garden. Color a beautiful soft apricot pink with orange center. June flowering. Plant in full sun 5" deep.

Each 75c; 6 for \$3.75

L. FORMOSANUM EARLY VARIETY (Formosa)

A very hardy, low growing form blooming during July and August. Flowers are long narrow trumpets, pure white, emerald green throat shaded externally violet. Plant 5-6" in lime-free soil, sunny location.

Each 50c; 6 for \$2.75

Note: We do not recommend for garden use L. Formosanum late variety because in most parts of the U.S. it will be killed by inclement weather before it has a chance to bloom.

L. GALAHAD (Sulphureum, Sargentiae, Regal Hybrid)

This new lily, a result of crossing and recrossing of the above named lilies, is a beautiful trumpet lily in soft sulphur-yellow. Besides its beauty it is a hardy, vigorous grower, producing numerous glowing flowers on its pyramidal raceme. Blooms in late summer. Plant 6" deep.

Large Bulbs, Each \$4.00

L. GOLDEN CHALICE (Jan de Graaff, Upright)

The form and clear lemon-yellow or golden color of this Umbellatum Hybrid makes it a very desirable lily. Free flowering and multiplies fast. June flowering. Plant in full sun 5" deep.

Each 60c; 6 for \$3.00

L. GOLD CREST (Hybrid by Mrs. J. C. Taylor, Philadelphicum X Tenuifolium)

An interesting small-flowered lily with slightly reflexed unspotted golden orange blooms carried in a crown at the top of the stem. Height 2 feet late June flowering. Plant 4" deep full sun.

Each \$2.50

L. GOLD RUSH (Jan de Graaff Mid Century Hybrid, Outwardfacing)

Outwardfacing golden yellow lily with a dozen or more large flowers on established plants. Deep brown stem with olive green, glossy foliage. A novelty of great merit. Plant 5" deep full sun.

Each \$2.25

L. GRACE MARSHALL (Preston Hybrid)

Deep grenadine red outfacing lily with up to 30 blooms on erect 4-5' stems. A showy garden lily. Blooms early July. Plant 5" deep, full sun.

Each \$1.00; 6 for \$5.00

L. GRENADIER HYBRIDS (Maximoviczii Wadai X Dauricum Wilsonii) Origin: Edgar L. Kline

A group of select seedlings from the same original cross of lilies listed above which received the first class certificate of the Massachusetts Horticultural Society when first exhibited in 1946. We find but little variation in this group from the original selection, mainly in height from 3-5 feet. The large, broad-petaled flowers are held horizontally, open flat with slightly recurved petal tip and are Chinese coral in color with oval dots of garnet brown. Extremely hardy and of easiest culture. July flowering. Plant 4" deep in full sun.

Each \$3.00

L. GUINEA GOLD (F. L. Skinner Hybrid Hansonii X Martagon)

This is a very attractive lily with numerous yellow recurved flowers which are thickly spotted brown. The buds are pink, offering a pleasing contrast to the open flowers. Of easy culture and best grown in partial shade. Height 3-4 feet, June-July flowering. Plant 4-5" deep.

Each \$3.00

L. HANSONII (Korea)

This graceful and dependable lily comes from Korea. It grows to a height of 4-5 feet and bears its foliage in whorls every few inches up the stem. Flowers are orange-yellow, spotted dark mahogany. Best grown in partial shade. Plant 6" deep, use plenty of peatmoss.

Each 75c; 6 for \$4.00

L. HARLEQUIN (Jan de Graaff Mid Century Hybrid, Outfacing)

An unusual shade of Salmon-buff, entirely new in lilies and particularly attractive. The large, outward-facing flowers are well spaced and look one squarely in the eye. The soft tones of this beautiful lily are seen at their best against a setting of glossy green foliage. Plant in full sun 5" deep.

Each \$2.00

L. HENRYI (China)

Commonly called the Orange Speciosum. It is one of the most dependable lilies, growing quite tall with large flower heads of golden yellow-orange with green central line. While this lily stands considerable dryness and neglect, with care it will produce stalks with 50 blooms and more. August flowering. Plant in full sun or light shade, 6" deep, using plenty of peatmoss.

7-8" each 75c; 6 for \$3.50; 10-12" each \$1.25

L. HENRYI CITRINUM

Chrome yellow pod-green throat. Flower type, foliage and flowering time similar to type Henryi.

Each \$3.00

L. HUMBOLDTII MAGNIFICUM (Pacific Northwest Native)

This is an extremely strong plant and very free flowering. The large reflexed flowers are a golden orange with maroon dots, each dot bordered by a crimson circle. Plant 8" deep in light shade, soil well mixed with peatmoss.

Each \$1.50

L. HURRICANE (Preston Hybrid)

The upward facing flowers of Vase shape give this lily a distinction of its own. Color deep red with a few brown spots, height 3½ feet, June-July flowering. Plant 5" deep full sun.

Each \$2.00

L. GIGANTEUM

The Giant Lily from the Himalayas

We do not know of a more interesting and exciting lily to grow than the Giant Lily. In England it is the pride of the big estates. In this country every flower lover can grow it who can meet the following requirements: a half-shade location, well drained acid soil (plenty of peatmoss mixed into the soil), plant food and water during the growing season. Giganteum should only be transplanted during the dormant season; October is the best time. The roots are not damaged the way we pack the bulbs and the lily will take hold in its new location before severe freezing sets in. Of course it should be planted at once upon arrival, roots should never be allowed to dry.

The big, glossy, heart-shaped leaves make a beautiful plant even if the bulb would never bloom, and to watch this lily grow is a source of never ending interest. The year the bulb blooms, the flower stem may grow up to a height of ten feet within about ten or twelve weeks. You can almost see it grow. It stands to reason that a plant which grows so rapidly must have plenty of plant food and water available during this period.

On the flowering stalk the lower leaves are very large, measuring as much as 52" around, towards the top leaves become smaller. Flower buds grow first in an upward position, finally opening in a downward position. The large, narrow trumpets, 8-10" long, are pure white outside, with narrow maroon stripes in the throat. The spicy, clove-like scent perfumes the air, increasing in intensity at night and even after the flowers fall the forming plump seedpods again make the plant attractive until the end of the season. **Only the year it blooms does Giganteum produce a flower stalk.**

After blooming the original bulb has spent itself. However, by that time numerous off-sets of varying sizes have been formed. Properly taken care of, these should in due time produce a continuous number of flowering bulbs. In our experience they all bloom within three years. We can think of few things that bring so much satisfaction and happiness to a nature and flower lover as this lily will.

Note: L. Giganteum cannot be transplanted in spring.

Our planting instructions sent with each order gives detailed information.

Small	\$1.50 each; should bloom the 3rd year.	} Blooms June - July
Medium	\$2.50 each; should bloom the 2nd year.	
Large	\$3.50 each; should bloom 1st or 2nd year.	

(All Prices Are Postpaid)

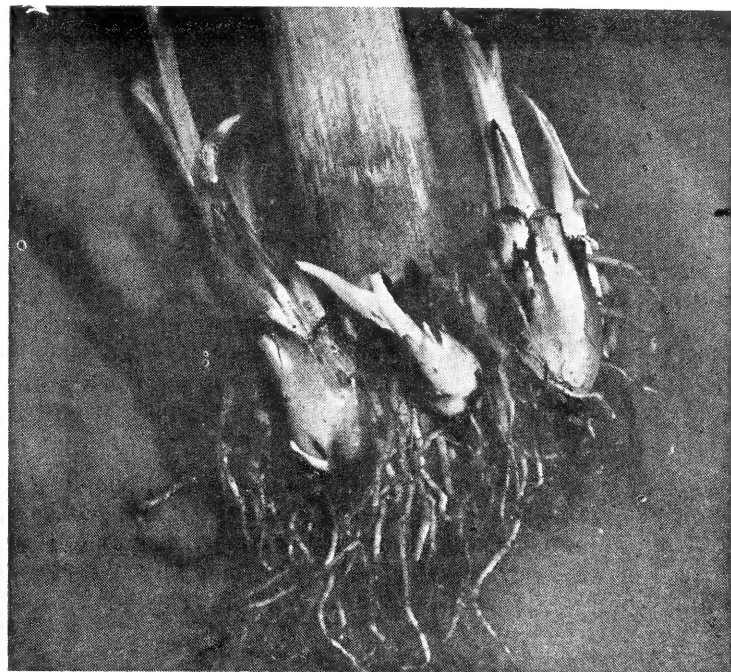

SUGGESTIONS TO LILY GROWERS

A well drained soil rich in humus is essential for all lilies. If your soil is heavy, lighten it with well-rotted leafmold or mix it with peatmoss. Peatmoss worked into the soil is essential to grow some lilies successfully; we do not know of any lily resenting it.

An ideal plant food for lilies is cottonseed meal mixed with peatmoss; keep moist for at least 30 days before using it, so it is completely fermented. Thoroughly rotted cow manure and composted leaf mold is also an excellent plant food for lilies or any other plants.

Composted sawdust is an excellent mulching material to keep lily bulbs and roots cool and moist.

Do your cultivating around your lilies early enough in spring before growth starts. After that, handweed only since hoeing would damage stem roots and other shallow roots. Sawdust mulch applied early will eliminate hoeing or cultivating.

Picture shows how L. Giganteum has formed new bulbs of varying sizes after original bulb has bloomed and spent itself.

L. JILLIAN WALLACE

This is a cross between Auratum and Speciosum originated in Australia. The flowers borne on an erect stem are of spectacular beauty, about seven inches across, almost flat, slightly recurving tips. The color is Tyrian Rose with a white margin up to ½" wide spotted with deep crimson. Fragrant. Unquestionably a sensational new lily. Same culture as Auratum.

Each \$10.00

L. JOAN EVANS (Jan de Graaff Mid Century Hybrid Upright)

This is a broad petaled, bright golden yellow upright lily. It carries from 6-9 flowers on wiry stems 4-5' tall. Flowers spotted maroon. Plant 5" deep, full sun.

Each \$1.25; 6 for \$6.25

L. LILLIAN CUMMINGS

A free flowering vigorous lily growing to a height of 4-5 feet with large, recurved, orange red blooms held almost horizontally on sturdy stems. Of easiest culture and increasing readily. Plant 5" deep, full sun or light shade.

Large bulbs 75c; 6 for \$3.75

L. LILYDALE CENTIFOLIUM HYBRID

(Originated in our Gardens) A truly magnificent new garden lily. Culture as easy as Regal. It grows to a height of 6 feet, established specimen will bear 15-35 immense trumpets almost twice as large as Regal. Color is white to velvety cream, open flared trumpet with tips of petals rolling back. Pleasantly fragrant. Plant in full sun or light shade 6" deep. Large hand selected bulbs.

9" and up, \$1.50 each; 6 for \$7.50; Dozen \$14.00

L. LONGIFLORUM ESTATE (Hardy Easter Lily)

This lily was originally propagated in the Southern Oregon coastal region and by far is the best of the Easter lilies for garden culture. Height 3-4', July flowering; 3-8 immense fragrant trumpets of great substance and lasting quality. Plant 6" deep in full sun, well drained location.

8-9" bulbs, each 75c; 6 for \$4.15; Dozen \$8.00

L. MARGARET JOHNSON (Hybrid with Tiger Lily Blood)

Semi-recurved medium sized flowers of bright Chinese coral dotted garnet brown. Flowers face outward. Vigorous mid-season lily of tigrinum parentage. Height 4 feet. July flowering, plant 4" deep in full sun.

Each \$1.50

L. MARHAN (Hybrid)

Dainty recurved flowers, buttercup yellow shaded and dotted oxblood red. Whorled foliage, plant in part shade 4" deep. Height 4 feet.

Each \$3.00

L. MARTAGON ALBUM (Europe)

This lovely form of L. Martagon is indeed one of the most graceful and dainty lilies to have in a garden. On stems 4 feet tall they carry 15-25 pure white, waxy and sweetly fragrant flowers. Still considered a rare gem in a flower garden. Blooms in late June, plant 5" deep in full sun.

Each \$1.00; 6 for \$5.00

L. MAXIMOWICZII WADAI (Early Tiger Lily)

This is an absolutely hardy, late blooming lily resembling L. Tigrinum carrying on established plants ten or more deep orange red reflexed flowers spotted dark mahogany. Blooms August-September, height 4-6'. Plant in partial shade, soil well mixed with peatmoss 5" deep.

Each 35c; 6 for \$1.75

L. MAXWILL (WillmottiaeX Maximowiczii Hybrid)

The 5-7 foot stems of this new hybrid produce 30 or more large, bright orange-red recurving flowers with graceful, long stamens and brick red anthers, a most interesting color combination. Blooms during late July. Plant in sun or partial shade 5" deep.

Large bulbs 50c each; 6 for \$2.75; Dozen \$5.00

L. MURIEL CONDE (Preston Hybrid)

The flowers on 5 foot stems are numerous, recurved, medium, golden orange with garnet brown dots and open during July. Like all Preston Hybrids it is vigorous, establishes itself well and of easiest culture. Plant 5" deep in full sun.

Each \$1.00; 6 for \$5.00

L. PAGODA (Jan de Graaff Mid Century, Upright)

It is one of the tallest uprights with stems 4 feet high and 6-8 flowers of a true orange chrome or Marigold orange. Plant 5" deep, full sun.

Each \$1.00

L. PARADE (Jan de Graaff Mid Century Hybrid, Outwardfacing)

A very large, rich yellow orange colored lily with a stripe of burnished gold through the center of each petal. Heavily spotted with minute black or maroon spots. The 12-15 flowers per stem are well spaced making it indeed a glorious lily. Plant 5" deep, full sun or light shade.

Each \$2.00

L. PARDALINUM (Native Oregon & California)

This west coast native lily grows in our gardens to a height of over 6-7' with as many as 20 blooms to a stem. Flowers recurved, medium sized, orange red shading to crimson at petal tips with mahogany spots. Best in partial shade, good drainage, soil well mixed with peatmoss. July flowering. Plant 5" deep.

Each 50c

L. PARDALINUM GIGANTEUM (Sunset Lily)

This is believed to be a natural hybrid having Humboldtii blood and is extremely robust growing to a height of 5-7 feet, flowers are larger and of a much deeper red than the type. The petals are thickly covered with deep purple spots, deep gold in the center of the flower. Same culture as above.

Each 35c; 6 for \$1.75

L. PARRYI (West Coast Native)

This lovely west coast lily is quite distinct from our other native lilies. The lightly spotted fragrant, canary yellow funnel-shaped flowers open in July on 3-5' stems. Will not establish itself unless the right growing conditions are provided. Must have well drained lime free soil, heavily mixed with peatmoss. Plant in partial shade 6-7" deep, keep moist at all times.

Each \$2.00

L. PAULINE KLINE (Havemeyer Hybrid Origin. Edgar L. Kline)

Flowers are semi-recurved (expanded 8" across) of majolica yellow shading to saffron, height 6', blooming in August. Plant 6-7" deep in light shade, use plenty of peatmoss mixed with soil.

Each \$5.00

L. PRINCEPS G. C. CREELMAN (True Regal X Sargentiae Hybrid)

This lily produces extraordinary heads of trumpet shaped flowers starting to bloom when L. Regal has finished to do so. Flowers white, lemon yellow center, shaded on the exterior brownish lavender. Plant 5" deep in full sun.

Large bulbs, each \$2.00

L. RADIANCE (Jan de Graaff Rainbow Hybrid)

This is a sister seedling of L. Flamingo but an Umbellatum hybrid with characteristics all its own. Radiance bears on stems 2½-4 feet tall, large flowers, orange-red in color. June-July flowering. Plant 5" deep, full sun or light shade. One of the earliest to bloom.

Each \$1.50

L. RED BIRD (Hybrid Dr. E. F. Palmer)

Like Galahad, this is a 1949 introduction and has many points in its favor. The 5-foot stem is clothed with an abundance of healthy leaves and bears its large, reflexed flowers facing outward. The good-sized dark red flowers, touched with tigrinum rose, will provide a most striking picture in the garden. It increases rapidly since it produces bulbils in its leaf-axils, a characteristic inherited from its part tigrinum parent. Blooms for a long period during late mid-summer. Plant in full sun 5" deep.

Each \$2.00

L. REGAL (China)

The best known of all trumpet lilies and still a "Regal" lily. One of the easiest to grow and most beautiful, its form and color are so well known they require no further description. June flowering. Plant in full sun 6" deep.

Flowering size 25c; 6 for \$1.25; Dozen \$2.25

Medium size 35c; 6 for \$1.75; Dozen \$3.25

Large size 55c; 6 for \$2.75; Dozen \$4.75

L. REGAL ALBUM

An exceptionally fine strain of white Regals which were hand selected and grown under close supervision over a period of years.

Flowering size 30c; 6 for \$1.50; Dozen \$2.75

Medium size 40c; 6 for \$2.00; Dozen \$3.75

Large size 60c; 6 for \$3.00; Dozen \$5.50

L. RUBELLUM (Japan)

One of the most lovely of low growing lilies, carrying small trumpet shaped flowers of a light pink to rose pink shade on stems 1½ to 2 feet tall. An extremely early lily, blooming during May and early June. The flowers are fragrant and this lily will stand considerable shade. A very beautiful lily for rockery plantings and likewise does well in pots under cool greenhouse conditions. Plant 5" deep in well-drained location using plenty of peatmoss.

Each \$1.50

L. SARGENTIAE (China)

A large flowered trumpet lily rather similar to L. Regal but blooming several weeks later and bearing bulbils in the axils of the leaves. Plant 6" deep, well mulched to keep roots cool and moist.

Each \$1.00

L. SCOTTIAE (Light Form)

The stalk 2-3 feet, carries large recurved, salmon-orange colored flowers facing outward. Late June flowering and of easy culture, best planted in full sun 5" deep.

Large bulbs, each 85c; 6 for \$4.25; Dozen \$8.00

L. SCOTTIAE (Dark Form)

Similar habits and form as the above but darker in color and blooming in late May to early June which makes it one of the earliest lilies to bloom.

Large bulbs, each 85c; 6 for \$4.25; Dozen \$8.00

L. SKYROCKET

A remarkable fine hybrid with medium lightly recurved vermilion-red flowers dotted garnet brown. Grows to 6 feet. July flowering. Plant 5" deep, full sun.

Each \$2.00

L. SOVEREIGN (A New Preston Hybrid)

Another fine new yellow lily, somewhat similar to "Coronation" but richer in color, with larger blooms and more vigorous habit of growth. Height 2½-3 feet. June flowering. Plant 5" deep, full sun.

Each \$4.50

SPECIOSUM LILIES

(commonly known as Orchid Lilies)

There is hardly a plant that contributes so generously to the beauty of the garden and rewards the lover of flowers so richly for the little care devoted to it as this group of lilies. Given the right location, a soil well drained and mixed with a generous amount of peatmoss, they will bloom year after year, increasing steadily. While imported stocks of this lily grow to a height of 3-4 feet, often will not bloom the first year, our Oregon grown bulbs, according to reports from our customers in the middle west did grow the first year after planting to a height of 6 feet, flowering accordingly. The flowers of our Speciosum are outstanding. We ship them yearly to florists all over the nation to be used for corsages, weddings, etc. We offer the following varieties this year:

L. SPECIOSUM ALBUM NOVUM

A very superior Oregon grown white Speciosum with larger flowers than Kraetzeri. Flowers have a great keeping quality. The light greenish midrib and golden anthers enhance the beauty of the clear white flower. Tall, robust plant with broader foliage than other forms and less recurved flowers. Plant 6" deep.

Each \$2.50

L. SPECIOSUM LITTLE STAR

Some years ago this new unusual type showed up in a group of our speciosum lilies. Not quite as tall as magnificentum, foliage is broader and the flowers are somewhat smaller than any other speciosum. They do not recurve as much as Rubrum, indeed a beautiful star shaped flower. Excellent for corsages. Bulbs increase rapidly by division in addition to stem bulblets. Color similar to magnificentum. Plant 6" deep.

Each 85c

L. SPECIOSUM MAGNIFICUM

The flowers of this lily are truly magnificent. The stems are strong, dark purplish green, the foliage luxuriously glossy dark green. Magnificum is a more robust grower than the other types and according to our experience less affected by late spring frosts or summer heat. While we grow here in our gardens Rubrum and Magnificum in full sun, for other parts of the country we suggest you use a 4" mulch of peatmoss on Speciosum beds. The flowers of Magnificum are a rich carmine red, margined white with crimson spots. Long graceful stamens with chocolate colored anthers accentuate their beauty. Specimens will bloom for about a month during August and September. Plant 6" deep.

Large bulbs 9" up, each \$1.50; 6 for \$7.50; Dozen \$14.00

L. SPECIOSUM RUBRUM

The flowers of very large size have broad petals of white suffused pink, spotted rose. Anthers chocolate brown, fragrant. From thousands of seedlings we selected some years ago the best forms and seedlings, assuring uniformity. Our Rubrum lilies are far superior to the usual imported mixtures sold under this name. Plant 6" deep.

Extra large bulbs, each \$1.00; 6 for \$5.25; Doz. \$9.00

L. SULPHUR HYBRID GREEN GOLD

The prevailing color of this selection is described by its name. Buds pale green outside, opening to greenish yellow, with a green throat and pure golden anthers. 6-7 feet tall, strongly erect. Blooms late July-early August. Plant 6" deep, full sun or light shade.

Each \$4.00

L. SUTTON COURT (Backhouse Hybrid)

Flowers similar in shape to Hansonii and foliage is whorled as in that species. The flowers are carried on stems 4-6 feet and are basically pearl white, shaded over all with lemon-yellow and with oxblood red spots and golden anthers. A flower for the lover of dainty and exquisite plants. Plant in partial shade, June flowering and very long lasting. Plant 5" deep, use plenty of peatmoss.

Each \$4.00

L. THEODORE A. HAVEMEYER

(Hybrid L. Myriophyllum Var. Superbum X. L. Henryi—Cross made in 1933 by Mr. Tom Barry Lambertsville, N. J.)

This sensational lily is very scarce in the U. S. However, our stock has increased now to a point where we can offer it at only \$3.50 for the medium size bulb.

Our stock is the true Havemeyer. It is a vigorous grower. Bulbs that were not disturbed in our gardens for a few years grew to a height of 11 feet with 45-60 flowers to a stalk. The blooming period lasts over four weeks. In fact, the flower-heads are so heavy that staking is advisable. The flowers are large, 6-8" across, of semi-trumpet or bowl shape and of a warm, soft buff or creamy old ivory color with deep green at throat. Received Award of Merit from Royal Horticultural Society of England. Unsurpassed for cutting. August flowering. Plant 6-7" deep, light shade.

Medium bulbs, \$3.50 each; large bulbs \$5.00 each

SELECT L. T. A. HAVEMEYER SEEDLINGS

By growing thousands of Havemeyer seedlings and intercrossing them again with the most outstanding types in the group, Mr. Edgar L. Kline, one of the Pioneer Lily Specialists of the Northwest, has, over a period of 15 years developed some distinct strains, each entitled to be named. However, to make these remarkable lilies available now, instead of needing another 2-3 years for clonal selection, we are happy to offer the following new introductions.

Yellow and Gold Shades

Cream and white shades

Dark buff

Light buff

Bicolors: green and White

Bicolors: Green and cream

All these types are recurved or semi-recurved. There is only a very limited quantity available this season.

Culture same as T. A. Havemeyer. Order the shade you prefer.

Each \$3.00

L. TESTACEUM

This is one of the oldest hybrids among lilies originated around 1810 in Holland or Germany, exact information is lacking. An aristocrat among lilies, it grows to a height of 4-6 feet bearing 6-12 large, fragrant, recurved flowers of waxy texture. Color Nankeen yellow flushed pale pink, pollen a rich persimmon orange. The entire appearance and fragrance of this lily is exquisite. It requires a well-drained soil rich in humus, suggest to sprinkle a handful of wood ashes or powdered charcoal on top of soil after planting. Does best in light shade, plant 4" deep. Please order early.

Each \$2.00; 6 for \$10.00

L. TENUIFOLIUM (L. Pumilum)

This little garden lily is a native of Northeast Asia and is quite well known under the name Coral Lily. It grows to a height of 1½-3 feet, but the numerous small recurved flowers of waxy scarlet attract everyone seeing it in bloom for the first time. A pretty plant with its grasslike foliage and 15-25 blooms on established bulbs that is worthy of a place in every garden. Plant in full sun 4" deep, June flowering.

Each 30c; 6 for \$1.50; Dozen \$2.50

L. UMBELLATUM LILIES

All Umbellatums are lilies easy to grow and they establish themselves readily in your garden. Give them a place in the sun or partial shade and you will enjoy their sturdy growth and varied gay colors. We offer the following selections:

L. UMBELLATUM CHIEF CHINOOK

Originally developed in northern Washington by Mrs. Agnes Sarles at her Clearbrook Variety Gardens with the encouragement of the late Dr. Griffith, then director of the Experiment station at Bellingham. The upright flowers measure 5½ to 6" across and are apricot color at the base shading to capsicum red at the tips with few dark mahogany spots. Free flowering, often carrying 15-20 flowers on stems 2½ to 4 feet in height. Early June flowering. Plant 4" deep.

Each 75c

L. UMBELLATUM ERECTUM (Hybrid)

A light reddish orange large flowered very erect lily. Very suitable to be grown in pots. Plant 4" deep.

Each 50c; 6 for \$2.75; Dozen \$5.00

L. UMBELLATUM INCOMPARABLE (Hybrid)

The rich crimson red of the large flowers make them incomparable indeed. A few bulbs of Flamingo planted close to it makes a vivid color combination. Height 2-3 feet. June flowering. Plant 4" deep.

Each 50c; 6 for \$2.75; Dozen \$5.00

L. UMBELLATUM MIXED HYDRIDS

Colors range from yellow and apricot tipped with flame, to orange tipped with red. The main distinction of this group besides color is the higher number of blooms per stem, often 10-15, half a dozen open at the same time, producing a large bouquet on one stem. Plant 4" deep.

Each 50c; 6 for \$2.75; Dozen \$5.00

L. VAGABOND (Jan de Graaff Mid Century Hybrid Outwardfacing)

Of a distinct salmon-orange coloring with enormous flowers that face out and light up the garden with their brilliance. Plant in full sun 5" deep.

Each \$1.50

L. VALIANT (Dr. E. F. Palmer Hybrid)

This is a sister seedling of L. Redbird (Croceum X Elegans Mahogany X Tigrinum). The large flowers, however, are deep cardinal red, heavily dotted black. Established bulbs carry stems up to 5 feet with a raceme of 12-16 flowers which open quite flat and recurve at the tips. July flowering. Plant in full sun, 5" deep.

Medium size bulbs \$2.00

Large size bulbs \$3.00

L. WILMOTTIAE

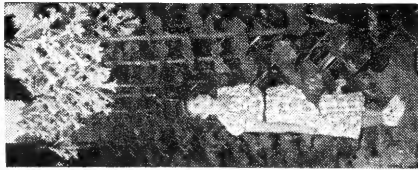

From China comes this lily. We have it growing in our gardens with as many as 45 recurved, orange red, black dotted flowers to a stem. Of added beauty is the dense, fine foliage with which the 4-5 foot stalks are covered. July flowering. Plant 5" deep, full sun or very light shade.

Each 50c; 6 for \$2.75; Dozen \$5.00
